-  **Outstanding water filtration, created by BRITA**
In the business of smarter drinking water choices since 1966.

Contact us today and let's talk about your BRITA water dispenser solution | www.brita.net

Passionate about water, passionate about you

Enabling organisations like yours to enjoy smarter water choices has been our family business since 1966.

Water is our source of life, our everything. With this belief, Heinz Hankammer founded the company in Taunusstein, Germany, in 1966. The fascination for water continued under his son Markus Hankammer and guides our actions to this day.

Today, BRITA offers professional filtration solutions and mains-fed dispensers in addition to consumer products. Every day, over 95,000 BRITA water dispensers serve more than 2.5 million people in workplaces worldwide. These range from famous car manufacturers, to leading hospitality chains, to tech companies in Silicon Valley.

When it comes to smart drinking water choices, we know a thing or two. We combine over 50 years' experience with a broad product portfolio and corresponding services. So, you're sure to find just the right solution for you.

German technologies - worldwide applications

BRITA is a global brand, with products sold in 70 countries on all five continents. BRITA dispensers are made in Germany and Italy, and are available in 57 countries, including in EMEA, Australia and North America. What's more, we offer customers dedicated international key account management.

Made-in- Europe quality

Our family business draws on over 50 years' experience to design and build our pioneering products. We develop and make filters in Germany, our dispensers in Italy. We engineer and manufacture our products ourselves. This means we can ensure exceptionally high quality, and scale production in line with demand.

Our manufacturing plants - including one opened in 2018 - work with maximum energy efficiency through use of advanced technology.

BRITA staff are skilled and dedicated. They complete many tasks by hand, so a high degree of craftsmanship goes into each dispenser. But the latest technology also belongs to our working tools. For example, ergonomic lifting aids and tablets that display instructions. Hololens headsets help workers in Italy quickly resolve any issues. They direct questions straight to the headquarters team and get answers back in real time.

A closer look at the dispenser lifecycle

1. Purchase of materials and pre-production

More than 70% of our product components come from European suppliers, reducing their overall carbon footprint

2. Transport

We lower emissions from product transport through smarter purchasing decisions which minimise transport distances

Our water dispensers produce 86 % lower carbon emissions* than bottled water and 64% less* carbon than bottled water dispensers

3. Production at BRITA

We use certified green electricity at our European production sites in Germany and the UK. So, most of our indirect energy needs are met by renewable sources

5. Customer use

BRITA products help our customers to cut costs, waste and carbon emissions associated with single-use plastic bottles

4. Packaging

We've replaced the bubble wrap and foam packaging of spare parts with eco-friendly paper alternatives and only use cartons made from 80% recycled materials

6. Disposal

When our water dispensers reach the end of their long lifetime, the dispenser system is shredded, and the raw materials recycled responsibly

Hotels, restaurants, catering

Serve up high-quality refreshment.

Offer your visitors and guests the very best water – in your hotel, restaurant, bar or conference room.

All you need is mains water. Your BRITA dispenser takes care of the rest. It transforms mains water into a deliciously refreshing drink that reflects the quality of your establishment.

Filtration ensures an excellent taste. Your guests can choose from chilled, still or sparkling water. And you can replace those expensive, wasteful single-use bottles with reusable BRITA designer bottles. There's the option of branding with your logo, too.

The result is good for your customers and good for your business. You enjoy a complete solution delivering outstanding cost-efficiency and a smaller ecological footprint. So proudly serve guests your very own water – regional, refreshing and remarkable.

More sustainable
a convenient, eco-friendly alternative to single-use plastic bottles

- Flat: on cabinet front

Filtration power for your needs

With BRITA's proven filtration solutions, you can be sure of excellent water – meeting the highest hygiene, quality and environmental standards.

Activated carbon

Reduces substances that impair taste and odour.

Ion exchanger

Reduces limescale and metals, e.g. lead.

Membrane

Filters out bacteria and cysts

Whatever the composition of the local mains water at your organisation, you'll find an effective filtration solution at BRITA. From activated carbon to ion-exchange resins, pre-filters, post-filters, double-layer and hollow fibre membranes, we have over half a century's expertise built into each of our BRITA filtration and treatment solutions, and our BRITA water dispensers.

With BRITA, you can be sure of Made-in-Europe quality. All our filters are manufactured in Germany, and BRITA water dispensers are assembled in our production facility in Italy. We take care to produce sustainably wherever possible. For example, we use coconut shells for our activated carbon.

You can be sure of excellent water – meeting the highest hygiene, quality and environmental standards as well as delighting the tastebuds – with proven filtration solutions from BRITA.

Benefits of BRITA filtration technology

When dispensing cold still or sparkling water:

- refreshing water with improved taste, every time
- reduced cloudiness for crystal-clear drinking water
- reliable dispenser operation, outstanding safety and hygiene

When dispensing hot water:

- development of full, rich aroma and flavour for tea
- protection against limescale build-up to maximise your machine's lifetime and performance

The CLARITY Protect 1 water dispenser filter ensures exceptionally clean water

Mains water is strictly monitored, but some bacteria, metals, microplastics and organic impurities could remain or be introduced, via piping for example. CLARITY Protect keeps these unwanted germs and particles out of your drinking water, and also reliably reduces treatment residues, such as chlorine, that affect its taste and smell.

Hot water filtration with PURITY C Dispenser 2 filter

The PURITY C Dispenser filter protects the dispenser by reducing water hardness, tackling the common problem of limescale. It also removes unwanted, taste-impairing substances. And with its bypass settings, you can control the degree of hardness – just the right amount, for instance, to prepare a perfect cup of tea.

BRITA ThermalGate™

Hygiene feature: The powerful thermal disinfection solution from BRITA.

The tap is automatically heated to over 125°C at regular intervals for thermal disinfection.

Contact us today and let's talk about your
BRITA water dispenser solution | www.brita.net

ThermalGate™
Protects against
retrograde contamination.

ThermalGate™ is continuously active,
providing protection not only at peak
times, but also during periods of inactivity
e.g., at night or on weekends

Does not require manual
effort or chemical additives

Developed through over 20 years'
experience in the healthcare market

BRITA HygienePlus

An industry benchmark hygiene feature.

- The first safeguard is the BRITA CLARITY Protect filter at the inlet. This includes a pre-filter to remove coarser particles, activated carbon filtration to reduce substances that impair taste and odour, and hollow fibre membrane filters to reduce pharmaceuticals, organic impurities and metals such as lead. The hollow fibre membrane filters out 99.999% of bacteria (including E. coli and Legionella) and 99.95% of cysts
- Next up is the BRITA CLARITY Safe X3. This filter – located directly upstream of the dispenser tap – is a very fine, asymmetrical double-layer membrane that removes any potentially remaining bacteria and microbial cysts just before the water is drawn. The double-layer membrane filters out microplastics, 99.99999% of bacteria (including Pseudomonas aeruginosa) and 99.95% of cysts
- Finally, BRITA's powerful ThermalGate™ feature regularly heats the dispenser outlet tap automatically. This shields against contamination from external sources, such as touching the tap and aerosol droplets from sneezing or coughing

Our accessories

Find the match for your dispenser.

BRITA products don't stop with water dispensers and filters. We offer a comprehensive range of accessories to cover all your drinking water needs from dispensing to serving to cleaning.

Our premium quality bottles are easily refilled via our dispensers. They're customisable, too. Full or empty, they can be stored in crates specially designed for the various bottle types. As hygiene is a top priority, we supply everything you need to sanitise your BRITA dispenser and clean BRITA bottles. We offer a choice of bottle washing trays, compatible with professional and domestic dishwashers.

Our best-practice tip? We recommend cleaning your BRITA dispenser daily for extra peace of mind.

Looking for ways to reduce your carbon footprint?

Replacing plastic bottles with long-lasting BRITA bottles and corresponding accessories is an easy way to make a difference.

Are you looking for ways to shrink your carbon footprint?

We're here for you

Throughout the dispenser lifecycle.

Safety through maintenance

Regular, thorough maintenance is essential for first-rate hygiene. We service our dispensers 1-2 times a year as standard. And with our BRITA Dispenser iQ Connect App we will ensure a higher service quality due to clear dispenser data analysis. Our rental and full-service contracts cover any repairs made during the dispenser's guarantee period (5-10 years).

Reliably high service quality

Our employees are audited regularly. A supervisor will visit you, make sure you're satisfied and confirm our service engineer has done a good job. We give our staff top marks – but it's good to know customers agree! Our training programmes ensure our service quality gets better and better.

Advice and more – on tap!

Our service engineers and customer service agents work hard to make sure you're completely satisfied. We can answer any questions you have during on-site visits or via our dedicated hotlines.
