Passionate about water, passionate about you

Enabling organisations like yours to enjoy smarter water choices has been our family business since 1966.

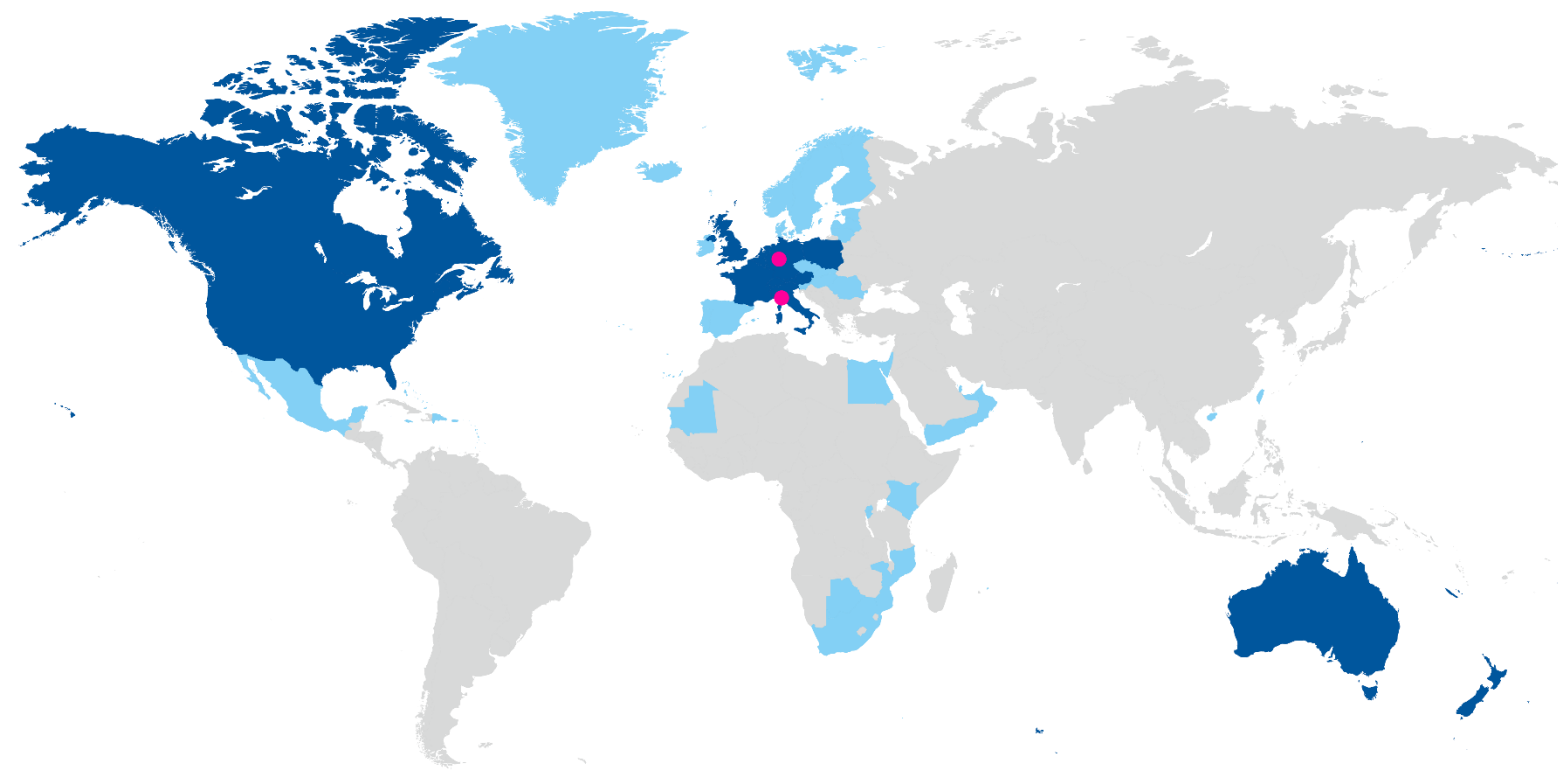

Water is our source of life, our everything. With this belief, Heinz Hankammer founded the company in Taunusstein, Germany, in 1966. The fascination for water continued under his son Markus Hankammer and guides our actions to this day.

Today, BRITA offers professional filtration solutions and mains-fed dispensers in addition to consumer products. Every day, over 95,000 BRITA water dispensers serve more than 2.5 million people in workplaces worldwide. These range from famous car manufacturers, to leading hospitality chains, to tech companies in Silicon Valley.

When it comes to smart drinking water choices, we know a thing or two. We combine over 50 years' experience with a broad product portfolio and corresponding services. So, you're sure to find just the right solution for you.

German technologies - worldwide applications

BRITA is a global brand, with products sold in 70 countries on all five continents. BRITA dispensers are made in Germany and Italy, and are available in 57 countries, including in EMEA, Australia and North America. What's more, we offer customers dedicated international key account management.

Made-in- Europe quality

Our family business draws on over 50 years' experience to design and build our pioneering products. We develop and make filters in Germany, our dispensers in Italy. We engineer and manufacture our products ourselves. This means we can ensure exceptionally high quality, and scale production in line with demand.

Our manufacturing plants - including one opened in 2018 - work with maximum energy efficiency through use of advanced technology.

BRITA staff are skilled and dedicated. They complete many tasks by hand, so a high degree of craftsmanship goes into each dispenser. But the latest technology also belongs to our working tools. For example, ergonomic lifting aids and tablets that display instructions. Hololens headsets help workers in Italy quickly resolve any issues. They direct questions straight to the headquarters team and get answers back in real time.

Offices and studios

The best employees
deserve the best water.

In your office, you want to provide staff, customers and guests with refreshing, high-quality water. It's part of the company culture.

But at many businesses, bottled water is the go-to "quick fix". You must buy it, store it and dispose of empty bottles. The result is loads of plastic waste. Not to mention squandered money and lost time.

There is another way. Water dispensers do away with these issues at a stroke. They ensure you have a convenient supply of consistently excellent water on hand. That encourages better hydration - and, in turn, helps your employees feel and be their best.

After all, water from your local mains is carefully controlled. But what's missing

are the technologies that deliver a first-rate drinking experience. Filtration, heating, cooling and carbonisation. And that's where BRITA dispensers come in.

More sustainable
a convenient, eco-friendly
alternative to single-use
plastic bottles

Cost-efficient
no need for expensive
purchase, transportation
and storage of pre-
bottled water

Greater well-being
encourages hydration,
improving productivity
and satisfaction

A complete, one-stop solution

Dispenser

Wide selection of models dispensing choice of water types

Filter

Find the best high-quality BRITA filter for your needs

Expert advice

Dispenser Taps

High-Volume
Bottling Dispensers

Benefits of BRITA Dispensers

- Sustainability champion: 86% less CO2 emissions compared to pre-bottled water*
- Manufactured sustainably: production plants in UK and Germany powered by certified renewable sources of energy, energy-efficient technologies used in all BRITA factories, water consumption at factories reduced through reuse of grey water
- Sustainable in use: BRITA dispensers designed with sustainability in mind (R290 natural refrigerant, stand-by mode, adjustable temperature setting)
- Durability: BRITA dispensers designed to be repaired or refurbished
- Individual settings: individual temperature adjustment on all dispensers can further reduce energy consumption
- Convenience: pre-programmable portion setting and water temperature
- Less limescale, more taste for hot water dispensers: proven BRITA filtration technology ensures excellent-tasting cold and hot water and prevents limescale. Just 1mm of scale build up results in 7% higher energy costs
- Safe and hygienic: BRITA dispensers tested to the highest level. For example our BRITA HygienePlus solution complies with the stringent food hygiene standards and microbiological specifications of the German Drinking Water Ordinance
- Reliable protection: BRITA filtration expertise in dispensers offers excellent protection against unwanted substances and organisms that can be found in mains water
- Premium Design, made in Europe: Made-by-BRITA quality, all filters manufactured in Germany, dispensers assembled in Italy

Filtration power for your needs

With BRITA's proven filtration solutions, you can be sure of excellent water – meeting the highest hygiene, quality and environmental standards.

Activated carbon

Reduces substances that impair taste and odour.

Ion exchanger

Reduces limescale and metals, e.g. lead.

Membrane

Filters out bacteria and cysts

Whatever the composition of the local mains water at your organisation, you'll find an effective filtration solution at BRITA. From activated carbon to ion-exchange resins, pre-filters, post-filters, double-layer and hollow fibre membranes, we have over half a century's expertise built into each of our BRITA filtration and treatment solutions, and our BRITA water dispensers.

With BRITA, you can be sure of Made-in-Europe quality. All our filters are manufactured in Germany, and BRITA water dispensers are assembled in our production facility in Italy. We take care to produce sustainably wherever possible. For example, we use coconut shells for our activated carbon.

You can be sure of excellent water – meeting the highest hygiene, quality and environmental standards as well as delighting the tastebuds – with proven filtration solutions from BRITA.

Benefits of BRITA filtration technology

When dispensing cold still or sparkling water:

- refreshing water with improved taste, every time
- reduced cloudiness for crystal-clear drinking water
- reliable dispenser operation, outstanding safety and hygiene

When dispensing hot water:

- development of full, rich aroma and flavour for tea
- protection against limescale build-up to maximise your machine's lifetime and performance

The CLARITY Protect 1 water dispenser filter ensures exceptionally clean water

Mains water is strictly monitored, but some bacteria, metals, microplastics and organic impurities could remain or be introduced, via piping for example. CLARITY Protect keeps these unwanted germs and particles out of your drinking water, and also reliably reduces treatment residues, such as chlorine, that affect its taste and smell.

Hot water filtration with PURITY C Dispenser 2 filter

The PURITY C Dispenser filter protects the dispenser by reducing water hardness, tackling the common problem of limescale. It also removes unwanted, taste-impairing substances. And with its bypass settings, you can control the degree of hardness – just the right amount, for instance, to prepare a perfect cup of tea.

BRITA ThermalGate™

Hygiene feature: The powerful thermal disinfection solution from BRITA.

The tap is automatically heated to over 125°C at regular intervals for thermal disinfection.

Contact us today and let's talk about your
BRITA water dispenser solution | www.brita.net

ThermalGate™
Protects against
retrograde contamination.

ThermalGate™ is continuously active,
providing protection not only at peak
times, but also during periods of inactivity
e.g., at night or on weekends

Does not require manual
effort or chemical additives

Developed through over 20 years'
experience in the healthcare market

BRITA HygienePlus

An industry benchmark hygiene feature.

- The first safeguard is the BRITA CLARITY Protect filter at the inlet. This includes a pre-filter to remove coarser particles, activated carbon filtration to reduce substances that impair taste and odour, and hollow fibre membrane filters to reduce pharmaceuticals, organic impurities and metals such as lead. The hollow fibre membrane filters out 99.999% of bacteria (including E. coli and Legionella) and 99.95% of cysts
- Next up is the BRITA CLARITY Safe X3. This filter – located directly upstream of the dispenser tap – is a very fine, asymmetrical double-layer membrane that removes any potentially remaining bacteria and microbial cysts just before the water is drawn. The double-layer membrane filters out microplastics, 99.99999% of bacteria (including Pseudomonas aeruginosa) and 99.95% of cysts
- Finally, BRITA's powerful ThermalGate™ feature regularly heats the dispenser outlet tap automatically. This shields against contamination from external sources, such as touching the tap and aerosol droplets from sneezing or coughing

Our accessories

Find the match for your dispenser.

BRITA products don't stop with water dispensers and filters. We offer a comprehensive range of accessories to cover all your drinking water needs from dispensing to serving to cleaning.

Our premium quality bottles are easily refilled via our dispensers. They're customisable, too. Full or empty, they can be stored in crates specially designed for the various bottle types. As hygiene is a top priority, we supply everything you need to sanitise your BRITA dispenser and clean BRITA bottles. We offer a choice of bottle washing trays, compatible with professional and domestic dishwashers.

Our best-practice tip? We recommend cleaning your BRITA dispenser daily for extra peace of mind.

Looking for ways to reduce your carbon footprint?

Replacing plastic bottles with long-lasting BRITA bottles and corresponding accessories is an easy way to make a difference.

Are you looking for ways to shrink your carbon footprint?

Replacing plastic bottles with long-lasting BRITA bottles and corresponding accessories is an easy way to make a difference.

We're here for you

Throughout the dispenser lifecycle.

Safety through maintenance

Regular, thorough maintenance is essential for first-rate hygiene. We service our dispensers 1-2 times a year as standard. And with our BRITA Dispenser iQ Connect App we will ensure a higher service quality due to clear dispenser data analysis. Our rental and full-service contracts cover any repairs made during the dispenser's guarantee period (5-10 years).

Reliably high service quality

Our employees are audited regularly. A supervisor will visit you, make sure you're satisfied and confirm our service engineer has done a good job. We give our staff top marks – but it's good to know customers agree! Our training programmes ensure our service quality gets better and better.

Advice and more – on tap!

Our service engineers and customer service agents work hard to make sure you're completely satisfied. We can answer any questions you have during on-site visits or via our dedicated hotlines.

BRITA Dispenser iQ Connect App

Our smart new tool to improve service quality and efficiency

Introducing the BRITA Dispenser iQ Connect App. For our service engineers, this means easier, more accurate work. And for you, the customer, a significant step in service quality and efficiency. The app's many functions include a detailed dispenser overview, setting configuration, updates and guided workflows.

Free of charge BRITA Dispenser iQ Connect App usable with Windows interface

Intuitive Design – or easier, more accurate servicing. Highlights relevant notifications and actions e.g., active errors or a required firmware update.

Time saving – “Copy & Paste”: save and share dispenser setting profiles and minimise time needed to configure new dispensers after installation.

Guidance – the service engineer is led through service processes with clear definition of the next required action.

Health – Instead of using the HMI, which can be difficult to reach physically, the app offers all relevant functions for dispenser servicing. The service engineer can place their laptop at the same height as the dispenser tap, for ease and convenience. So, no more lying under the counter to view the HMI display!

Security – is a top focus! Only authorised users have access to the app. Dispenser data that's temporarily stored locally before transfer is encrypted. And service engineers can disable uploading the machine data into the Cloud at the customer's request.

Stability – in the app's development, prioritisation is given to stabilising existing processes before adding more functions. So, not all functions are included with the app launch. It will be continuously extended via updates.

Automatic Firmware download – thanks to the automatic Cloud connection when an available internet is recognised, the app downloads new firmware versions immediately.

What do our customers think?

Using the BRITA system meant that we didn't have to transport pre-bottled mineral water, which has helped us reduce our carbon footprint.

Brand Manager for ACS | University of Sheffield
Katie Butler

The unique branded bottles with our name and logo really set us apart from other venues. Guests have often commented positively on their look-and-feel. Some have even asked if they could buy bottles.

Managing Director | Spreespeicher Event
Robert Hoyer

I think part and parcel of the original plan to involve BRITA was its environmental friendliness. And the project was very successful.

Contracts Manager | Springer Nature
John Haskell

I chose BRITA because they are a market expert. I felt that they had the right calibre and standards for BNP Paribas.

Hospitality & Catering Manager | BNP Paribas
Michael Flatter

We now have no deliveries of bottles of water coming in, and therefore no wasted plastic or glass. We are no longer wasting energy by boiling more water than we need or having to run the tap to wait for it to get cold.

Site Facilities Manager | Jewish Care
Lindsay Forrest

Our guests are delighted to be served our new "Georgenthaler water" (BRITA filtered tap water). And we have cut costs by a third.

Executive Assistant | Hotel Hofgut Georgenthal
Peggy Scheiding
